DETAILED ACTION

Claim Objections

1. Claims 1-4 and 7-10 are objected to because of the following informalities:

In claim 1, line 9, "a complex carrier" should be "the complex carrier". Also see claim 7 (line 14), claim 9 (line 10) and claim 10 (line 5).

In claim 4, line 2, "for a" should be "for the".

Wherein claims 2 and 3 depend on claim 1.

Wherein claim 8 depends on claim 7.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, lines 1 and 3, what is the difference between "a carrier" and "a complex carrier"? Also see claims 5, 7 and 9.

In claim 10, is "a phase error" recited in line 3 different than "a phase error" recited in line 3 of claim 9?

Wherein claims 2-4 depend on claim 1, claim 6 depends on claim 5, and claim 8 depends on claim 7.

Allowable Subject Matter

4. Claims 1-10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

References Strolle et al., Sugita et al., Aman et al., and Ahn are all related to carrier recovery circuits for converting baseband I and Q signals by multiplying digitized I and Q signals by a complex carrier according to a phase error.
